George Gray Barnard Complains Architects Did Not Allow for Angle of Vision From the Street

matters of history, and Sir which they were chosen.

"The trouble is very understandable. the great Round Table, are hangery sort of placement on pediments of the New York Public

George Grey Barnard, the sculptor who called into being these particular representations of the two, wanted and easy-way out of the ornamental confines of their pediment quarters. Leaning thus outward they could see and be seen from the street over the top of their cornice.

But, Mr. Barnard complains, the arthitects and sculptors who had charge of placing his groups did not at all arry out his designs. They, Donnelly & Ricci, set the muse and the might well back in the pediment, alogether too far back, Mr. Barnard eges, for a lover of either Clio or alahad to identify them from the reet or get the right appreciation of y & Ricca refused to show the pair ining outward as if to gaze at the te light focus of Forty-second

Stand in the street with a photothat Mr. Barrd says he intended for insertion in pediments and then gaze upward ents and there is no doubt there is creat difference between the conon and the completion, as Mr. mard relates it. In the photographs the groups the figures are shown zer stoops down close to them and ks upward the entire figures of Clio d Galahad can be made out. But m the street the line of the cornice hase of the pediment cuts across centre of the marble figures as now ced. In other words, the point gaze from the sidewalk hides all of lower part of the muse and the ht. Sir Galahad seems to be a berneck, and Clio, instead of gazing doings of the district and elseere, appears to be gazing outward o space, her mind not on her work. figures designed by Mr. Barhard were intended as show pieces in nnection with the library. There is library in the world ex-New York building in magtificence of architectural design and tistic accessories, in the opinion of persons. Galahad, the purest knight of It is the same old trouble that has so often marred art. It depends upon he joint cause of two lawsuits grow- how the sculptured values are caring out of their penned in strap- ried to the eye. You may call it the relation of the chiselled achievement to the point of view if you wish. It has to do with the difference between the mind's conception of an object and what the eye really sees of the object-the angle that it sees from, or the point of gaze.

"Now here we have the models of them to tip well forward in a free the knight and the muse designed for the library building pediment. Stoop down and you will be able to view them in the manner they would be viewed if you stood in the street and looked up at the pediment. Do you catch the lines and the lights?

"Notice how these figures project.

I made them that way so that from seventy-five or a hundred feet below they would still be seen practically in entirety. They slant from their base, or in other words are tipped out. Now when you stand in the street in front of the Public Library and look up what do you see? Why, your line of vision strikes the top of the corof vision strikes the top of the cornice or base of the pediment where

"Likewise in the south pediment the head and torso. I contend, of one but I cannot tell you why they botched it crosses the figures horizontally. about their centre. rough marble, for all you see of it.

accordingly. Its measurements and its aspects will be judged at 'handling' wise. distance. But the further away you intend the object to be observed or studied the more you have to take into consideration how you shall fashion it so as to preserve the effect planned.

"Had my figures in the pediments of the library building been tipped properly—or rather had they been in the eyes of every artist who in-set properly, because the tipping or spects them. They will have to be slanting had been allowed for in the sculpturing-the man who gazed up at them from the street would have seen all of the arms, hands and feet nor of visitors to New York." of knight and the muse as well as have understood what the figures were doing, or were represented as doing.

"Just in detail what are the discrep-

ancies between the figures I designed and the figures as placed in the pediments? Well, the papers connected with my suit set forth these discrepancies at length. In the north pediment I charge that the directions relative to setting the group plumb with the base of the pediment were ignored. The pose indicated in the model, I maintain, was never used. The knight in armor lacks eight to nine inches of marble on the chest and head. And the knight leans backward instead of forward. The sword customed to such sort of placing and other details are in wrong places could have made such a mistake as

parallel with the street is set cross-

"Then again the models were not placed together in the right way for pointing. The groups are not set in right, relative to the foundation or to each other. Seen from Fifth avenue they appear grotesque and unnatural. Thus these groups have been made worthless in my own eyes and spects them. They will have to be torn out and replaced. That is all there is to it. Such a thing must not offend the artistic eye of New York-

"How came it, Mr. Barnard, that parts of the other figures now hidden you permitted the groups to be placed in great part. The observer would in the pediments so negligently as you say, without stopping the work while in progress?"

"I was ill for nine months, As soon as I got out of the hospital I went to the Public Library and mounted the scaffold to see how things were progressing. One glance was enough. I wanted to---

The sculptor paused a moment. I expected some sort of good round threat. But he looked more sorrowful than angry. I waited a moment. "You wanted to-" I reminded.

"I wanted to jump off the scaffold," said Mr. Barnard. "How do you suppose workmen ac-

you say?" the sculptor was asked. of the figures, lack eight to nine inches it," he answered. "I left my models, plaster on a canvas framework, with two, which is more than you would smoke as black as obsidian and capped the firm who had the placing to do. have done for me." holes that had been negligently bored. For six months they were kept in the "This allowance for how a figure the face and head so that the face on the head of one of them, the faces will look fifty or a hundred feet up in appears eaten away. Seven and a half.

Seven and a half.

Again the bells jangled and with an

Again the bells jangled, and with an expiring snort or two the engines were still. The boat, bulking darkly behind her blinding, cyclopean eye, forged almost imperceptibly nearer. The stage plank swung out like a huge antenna, an upright figure, with a hawser bight in his hand, balancing

on its extreme end. At a sharp command from Capt. Calvert the plank was lowered away; the figure — a deckhand — sprang proudly down and made his hawser fast; the capstan pawls tinkled over the rachet ring; the engines were set back a stroke or two, and the Valley Belle snuggled against the end of the platform so gently as hardly to stir it. Calvert stepped ashore and greeted Bonebrake with ambassadorial dignity, accompanied by a wink.

"How much?" he murmured. "Three cents."

"Bully for you! A cent too much, but good enough. Run-tell the girl. She's nigh crazy."

The "girl" was standing on the hurricane deck with one hand on the big landing bell, her face faintly illuminated by the lights below. She flut-tered her handkerchief at Woody and he bounded up the forecastle com-

panionway three steps at a time. "I'll clean up better than twenty thousand!" he panted from his sprint. She gave a little cry of delight and extended both hands. It was a tense quarter of a minute which followed, her hands in his, her quick breath upon his cheek.

"Deeda, is Hillcrest to be mine-or ours?" From below came the creak of the forehatch windlass and the melodious, weird chant of the black roustabouts;

"De las' sack! De las' sack!" "Woody," she answered with falter-ing tenderness, "I have told you that I can never marry a gambler, whether his tools are cards or margins on ex-

He tightened his grip on her hands, "Deeda, if you'll marry me I swear never again to margin a stock, bond or package of produce." She smiled sadly. "You couldn't keep it, dear."

"Try me," he begged. She hesitated. "I will! I'll put you on probation for one year." "Make it six months. If I can hold out that long I can a year."

He swept her to his breast, he showered her face with kisses. But alas!-the sleekest rascals are those with angel faces!

"Oh, make it three months, my darling! That will give you plenty of t me to make your wedding pretties, and if I can hold out three months, I
